Question Number : 7 Question Id : 4410092118782 Question Type : MCQ

A company observes that one market segment offers high growth potential but is already served by many competitors. What should the company primarily consider before selecting this segment as its target market?

Options :

1. Ignoring the existing level of market competition
2. Assessing the competitive intensity and profit potential
3. Considering only the projected market growth rate
4. Selecting the segment solely because of its market size

Question Number : 8 Question Id : 4410092221054 Question Type : MCQ

A global technology summit targets only companies with annual revenues exceeding ₹5,000 crore because the sponsorship packages require substantial financial commitments. Which segmentation base best explains this decision?

Options :

1. Companyographics segmentation
2. Benefit segmentation based segmentation
3. Industry sector based segmentation
4. Geographic segmentation

Question Number : 9 Question Id : 4410092118614 Question Type : MCQ

How does segmentation support more accurate measurement of marketing performance metrics?

Options :

1. Segmentation enables tracking results for each distinct customer group accurately.
2. Segmentation involves measuring only overall marketing performance annually.
3. Segmentation requires ignoring segment-level data when evaluating outcomes.
4. Segmentation means dividing markets strictly based on product categories.

Question Number : 10 Question Id : 4410092118952 Question Type : MCQ

A consumer electronics company discovers through customer insight that buyers prioritize ease of use over advanced technical features. According to the marketing process, what should be the firm's next strategic priority?

Options :

1. Redesign the product's value proposition around user convenience.
2. Increase advertising expenditure to emphasize technical superiority.
3. Strengthen customer retention programs through loyalty rewards.
4. Conduct post-purchase satisfaction surveys to assess product acceptance.

Question Number : 11 Question Id : 4410092118953 Question Type : MCQ

Which of the following best describes 'relaunching' a brand within the context of brand management?

Options :

1. Updating a brand's image and marketing to regain market interest
2. Changing only the company logo for new packaging
3. Launching a new product line with the same brand name
4. Discontinuing a product to reduce company losses

Question Number : 12 Question Id : 4410092221056 Question Type : MCQ

A nutrition brand in the maturity stage of its life cycle seeks to refresh customer engagement. The team integrates a digital analytics dashboard to monitor influencer campaign effectiveness. Which outcome best reflects an advanced use of digital tools in managing the brand at this stage?

Options :

1. Archiving influencer performance data for periodic campaign evaluation
2. Dynamically adjusting campaign messaging using real-time performance insights
3. Running identical influencer campaigns across all digital platforms
4. Evaluating the campaign effectiveness only through post-campaign sales reports

Question Number : 13 Question Id : 4410092118031 Question Type : MCQ

A beverage company introduces a new flavor of its existing soda drink under the same brand name. What type of brand extension is this?

Options :

1. Brand alliance
2. Brand revitalization
3. Line extension
4. Category extension

Question Number : 14 Question Id : 4410092118954 Question Type : MCQ

A multinational organization intends to use a single logo across diverse international markets and communication platforms. Which characteristic is most critical for supporting a strong and consistent brand identity?

Options :

1. Ensuring the logo remains simple, memorable, and easily reproducible
2. Designing the logo with region-specific artistic elements and symbolism
3. Incorporating detailed illustrations that reflect multiple brand attributes
4. Revising the logo regularly to align with changing design preferences

Question Number : 15 Question Id : 4410092118032 Question Type : MCQ

Which risk is most significant when a brand's slogan is too generic?

Options :

1. It may become difficult to translate effectively across different languages.
2. It may create unfavourable perceptions of the brand among customers.
3. It may fail to differentiate the brand from competitors.
4. It increases the risk of legal challenges due to trademark conflicts.

Question Number : 16 Question Id : 4410092118618 Question Type : MCQ

A company plans to launch an innovative wearable device in a market where consumer preferences are poorly understood. Before designing a nationwide survey, which research approach should be used first?

Options :

1. Financial data analysis
2. Large-scale field experiment
3. Structured questionnaire survey
4. Focus group discussions

Question Number : 17 Question Id : 4410092118957 Question Type : MCQ

Which is a primary benefit of using Virtual Reality (VR) in the consumer decision-making process?

Options :

1. It allows real-time tracking of product delivery status
2. It offers after-sales support through automated chatbots
3. It helps consumers visualize product usage before purchase
4. It sends promotional alerts to consumers during checkout

Question Number : 18 Question Id : 4410092221061 Question Type : MCQ

A business introduces "Buy Now" buttons directly within influencer-generated content, allowing followers to complete purchases immediately. Which strategic advantage of social commerce is primarily achieved?

Options :

1. Reduced friction between product discovery and purchase
2. Expanded product assortment across multiple distribution channels
3. Improved inventory management through demand forecasting
4. Increased operational efficiency through warehouse automation

Question Number : 19 Question Id : 4410092118452 Question Type : MCQ

A digital retailer finds that social commerce campaigns are becoming less effective. Customer feedback indicates slow responses to purchase inquiries on social media. What should the retailer prioritize?

Options :

1. Increasing advertising investment across social media channels
2. Improving response speed to customer purchase inquiries
3. Publishing promotional content more frequently each week
4. Introducing customer reward incentives across platforms

Question Number : 20 Question Id : 4410092118786 Question Type : MCQ

When constructing a predictive model for consumer churn in a subscription-based service, which step is most critical for ensuring that the model produces valid and actionable business insights?

Options :

1. Randomly partitioning the data into training and testing datasets repeatedly.
2. Non-standardizing every available variable before model estimation begins.
3. Selecting relevant predictor variables through domain knowledge and data analysis.
4. Increasing model complexity to capture every observed consumer behaviour.

Question Number : 21 Question Id : 4410092221059 Question Type : MCQ

A consumer assigns numerical scores to different brands for fuel efficiency, safety, and maintenance cost, multiplies each score by the importance assigned to the attribute, and selects the brand with the highest total score. Which consumer evaluation approach is illustrated?

Options :

1. Multi-attribute compensatory evaluation model
2. Habitual decision-making based on prior experience
3. Impulse buying through affective preference formation
4. Variety-seeking behavior through random selection

Question Number : 22 Question Id : 4410092118789 Question Type : MCQ

Why is understanding consumer behaviour considered essential for marketers in developing successful business strategies?

Options :

1. It enables accurate forecasting of seasonal sales volume fluctuations
2. It helps in setting advertising budgets across media channels
3. It guides the selection of distribution channels and retail formats
4. It helps in designing effective marketing strategies

Question Number : 23 Question Id : 4410092118622 Question Type : MCQ

Options :

1. Personality is shaped primarily by unconscious motives and conflicts.
2. Personality develops through the pursuit of self-actualization and personal growth.
3. Personality consists of stable, measurable traits that distinguish individuals.
4. Personality is acquired mainly through observation and imitation of others.

Question Number : 24 Question Id : 4410092118453 Question Type : MCQ

A retailer evaluates a loyalty program using customer analytics and finds that identical incentives produce significantly different spending outcomes across motivational segments. Which managerial response is most appropriate?

Options :

1. Expand campaign coverage to increase participation across all segments.
2. Increase reward values without changing the segmentation approach.
3. Develop differentiated loyalty strategies based on motivational characteristics.
4. Replace motivational segmentation with geographic market segmentation.

Question Number : 25 Question Id : 4410092118454 Question Type : MCQ

A consumer changes a purchase decision after discussing the product with trusted individuals and considering widespread public information about the brand. Which factor best explains this behaviour?

Options :

1. Interaction of interpersonal communication and public information sources
2. Dependence on routine purchasing with minimal information search
3. Influence of financial incentives and government policy measures
4. Reliance on product availability and distribution efficiency alone

Question Number : 26 Question Id : 4410092118791 Question Type : MCQ

Which of the following best describes a key function of Customer Relationship Management (CRM) in digital marketing?

Options :

1. Supporting segmentation based on customer behavior and purchase history
2. Automating bulk email sends without personalization or tracking
3. Managing social media content approval workflows for brand teams
4. Calculating search engine ad bids for keyword auction management

Question Number : 27 Question Id : 4410092221064 Question Type : MCQ

A telecommunications company integrates customer interactions from its mobile application, website, call center, and retail stores into a single customer profile. Which CRM characteristic is most evident?

Options :

1. Omnichannel integration supporting unified customer relationships
2. Functional specialization supporting departmental independence
3. Cost leadership supporting operational efficiency improvements
4. Product differentiation supporting manufacturing flexibility

Question Number : 28 Question Id : 4410092118039 Question Type : MCQ

What is a primary benefit of implementing collaborative CRM in an organization?

Options :

1. Exclusive customer targeting across selected market segments
2. Direct increase in short-term sales through promotions
3. Enhanced information sharing among business functions
4. Immediate reduction in organizational operating costs

Question Number : 29 Question Id : 4410092118624 Question Type : MCQ

Which metric is the most appropriate for evaluating the long-term return on investment (ROI) of a CRM system?

Options :

1. Growth in customer lifetime value after CRM adoption
2. Short-term sales increases after CRM campaign launches
3. Initial CRM implementation cost relative to total revenue
4. Number of customer satisfaction surveys completed annually

Question Number : 30 Question Id : 4410092118625 Question Type : MCQ

In operational CRM, what ensures seamless information sharing across departments?

Options :

1. Automated call scripts
2. Predictive analytics
3. Integrated customer database
4. Online customer surveys

Question Number : 31 Question Id : 4410092118794 Question Type : MCQ

Which element is most essential for developing an effective content calendar in a content marketing strategy?

Options :

1. Calculating annual advertising budgets for promotional campaign planning.
2. Monitoring weekly competitor advertising activities across digital platforms.
3. Analysing monthly product pricing strategies across competitive markets.
4. Identifying audience-relevant topics for consistent content development.

Question Number : 32 Question Id : 4410092118041 Question Type : MCQ

What is the primary purpose of using header tags (H1, H2, H3) in SEO-optimized content?

Options :

1. Load images faster
2. Improve internal linking
3. Control site speed
4. Organize content structure

Question Number : 33 Question Id : 4410092118457 Question Type : MCQ

If a marketing analyst wants to attribute sales to the correct marketing channel in Google Analytics, which attribution model should be selected to give credit to the last channel a user interacted with before purchase?

Options :

1. Last Interaction model
2. Time Decay model

4. First Interaction model

Question Number : 34 Question Id : 4410092118795 Question Type : MCQ

Which approach most effectively enables a marketer to isolate and measure the impact of personalized content on email campaign conversions across different audience segments?

Options :

1. Test personalized vs control content
2. Track opens and clicks by segment
3. Send same email to all segments
4. Compare current vs past campaigns

Question Number : 35 Question Id : 4410092221066 Question Type : MCQ

A digital media startup launches a new content platform and compares two experimental groups. One randomly selected 20% customer segment receives targeted push notifications, while another randomly selected but comparable 20% segment receives personalized content recommendations. Engagement rates are then compared. Which action best exemplifies robust data-driven decision making?

Options :

1. Averaging overall platform engagement rates to make the investment decision
2. Using the scenario comparison results to inform future marketing resource allocation
3. Relying on the team's prior experience with similar platforms to choose a strategy
4. Selecting the strategy with the highest single-week engagement result

Question Number : 36 Question Id : 4410092118043 Question Type : MCQ

Which metric measures the effectiveness of a mobile ad campaign?

Options :

1. Click-through rate
2. Device type
3. Video length
4. Ad budget

Question Number : 37 Question Id : 4410092221070 Question Type : MCQ

A newly launched e-commerce website consistently publishes high-quality research reports that are cited by reputable industry websites without requesting links. Which off-page SEO technique is primarily responsible for improving the website's search ranking?

Options :

1. Earning authoritative backlinks through valuable content creation
2. Increasing keyword density across product description pages
3. Improving website loading speed through image compression
4. Optimizing internal links between category landing pages

Question Number : 38 Question Id : 4410092118044 Question Type : MCQ

During keyword research for a new product launch, which tactic minimizes risk of cannibalization and maximizes topical authority?

Options :

1. Targeting only broad keywords
2. Segmenting keywords by search intent
3. Aggregating all keywords into one page
4. Focusing on competitor top-ranking keywords

Question Number : 39 Question Id : 4410092118045 Question Type : MCQ

During a crisis, how should social media content planners adjust their calendar to maintain brand reputation and audience trust?

Options :

1. Pause scheduled promotions
2. Share only positive stories
3. Ignore the crisis and continue
4. Continue promotions as planned

Question Number : 40 Question Id : 4410092221069 Question Type : MCQ

A language-learning application conducts an experiment comparing the Call-to-Action (CTA) "Start Learning" and "Claim Your Free Lesson" to determine which produces more subscriptions. Which mobile app marketing practice is illustrated?

Options :

1. A/B testing to optimize CTA effectiveness and conversions
2. Market segmentation to improve audience classification accuracy
3. Search optimization to improve application discoverability
4. Influencer marketing to improve application credibility

Question Number : 41 Question Id : 4410092118046 Question Type : MCQ

Which technology marked the first wave of digital media evolution?

Options :

1. Radio
2. Television
3. Print
4. Internet

Question Number : 42 Question Id : 4410092118463 Question Type : MCQ

A virtual assistant escalates complex customer complaints to human agents. What is the primary benefit of this approach?

Options :

1. It automates every customer service interaction.
2. It guarantees immediate resolution of every complaint.
3. It enables human handling of complex customer issues.
4. It completely removes the need for human agents.

Question Number : 43 Question Id : 4410092118462 Question Type : MCQ

If ASCI's recommendation for ad modification is not followed by an advertiser, what consequence can ASCI enforce under its current role?

Options :

1. ASCI can impose a monetary fine on the advertiser
2. ASCI can publish the advertiser's non-compliance in public reports
3. ASCI can revoke the advertiser's business license
4. ASCI can prosecute the advertiser in court

Question Number : 44 Question Id : 4410092118632 Question Type : MCQ

Which metric best indicates increased consumer interest following exposure to an advertisement?

Options :

1. Higher advertisement production costs
2. Lower advertisement frequency
3. Increased website traffic
4. More creative awards

Question Number : 45 Question Id : 4410092118047 Question Type : MCQ

Which stage in the information processing model best reflects when a consumer links a marketing message to prior knowledge to derive meaning?

Options :

1. Retention
2. Attention
3. Acceptance
4. Comprehension

Question Number : 46 Question Id : 4410092118633 Question Type : MCQ

Why is Integrated Marketing Communication (IMC) critical for consistent brand communication globally?

Options :

1. IMC emphasizes product innovation before communication strategies
2. IMC ensures unified messaging across all marketing channels
3. IMC focuses on lowering overall marketing campaign costs

3. Media
4. Measurement

Question Number : 49 Question Id : 4410092118049 Question Type : MCQ

When a print ad campaign requires consistent message exposure across multiple regions, which scheduling strategy is most effective?

Options :

1. Flighting schedule in select regions
2. Randomized schedule without targeting
3. Continuous schedule nationwide
4. Pulsing schedule with regional customization

Question Number : 50 Question Id : 4410092118465 Question Type : MCQ

A multinational brand is planning internet advertising in countries with different privacy regulations. What should be the first compliance consideration when designing the campaign?

Options :

1. Delay compliance review until campaign launch
2. Apply the brand's home country standards everywhere
3. Focus on creative content before checking regulations
4. Align ad data practices with each region's privacy laws

Question Number : 51 Question Id : 4410092118051 Question Type : MCQ

Which feature distinguishes a joint venture from a simple licensing agreement?

Options :

1. Shared ownership of a new entity
2. Exclusive use of a brand
3. Distribution rights only
4. Export of finished goods

Question Number : 52 Question Id : 4410092118468 Question Type : MCQ

A company experiences declining sales in a foreign market after a new local-content requirement is enacted. What is the most likely cause related to trade barriers?

Options :

1. The company cannot meet the requirement, limiting its market access
2. The requirement guarantees easier market entry
3. The company automatically complies with all regulations
4. The requirement leads to increased import demand

Question Number : 53 Question Id : 4410092118637 Question Type : MCQ

Which limitation of AI-driven sentiment analysis is most likely to reduce the accuracy of international market research?

Options :

1. Misclassifying culturally nuanced expressions
2. Faster data collection speeds up analysis
3. Automated surveys increase response rates
4. Larger datasets require more storage space

Question Number : 54 Question Id : 4410092118974 Question Type : MCQ

Which benefit is most closely associated with integrating advanced analytics platforms in international market research?

Options :

1. Narrowed access to digital channels for research
2. Improved identification of emerging global trends
3. Increased manual data collection in global markets
4. Enhanced reliance on intuition for decision-making

Question Number : 55 Question Id : 4410092118052 Question Type : MCQ

Which term refers to the image a company creates for its product in the international market?

Options :

1. Brand extension
2. Brand loyalty
3. Brand identity
4. Brand equity

Question Number : 56 Question Id : 4410092118640 Question Type : MCQ

How do eco-labels contribute to ethical international marketing practices?

Options :

1. They increase overall operational costs for global companies
2. They help consumers identify genuinely sustainable product offerings
3. They reduce export tariffs for certified green products
